

**SYSTEM, METHOD AND COMPUTER PROGRAM PRODUCT FOR AN
ANALYSIS CREATION INTERFACE IN A SUPPLY CHAIN MANAGEMENT
FRAMEWORK**

5

ABSTRACT

10 A system, method and computer program product are disclosed for analysis creation
utilizing a supply chain graphical user interface. A graphical user interface is utilized to
select between a plurality of options with each option corresponding to a separate
technique of creating an analysis. A new analysis is generated upon the selection of a
first of the options. Upon the selection of a second of the options, a previous analysis is
edited. Also, upon the selection of a third of the options, a bid proposal is integrated with
an integrated analysis.
